

ABSTRACT

A cosmetic and tissue cleansing composition including mineral salts, preferably Dead Sea mineral salts as an effective agent to minimize the effect of itching on the skin from a condition caused by psoriasis. In another form, the composition can be used as an exfoliating or scrubbing composition. The composition being formulated with a non-oily base which is water soluble such that the granules which are mineral salts act as exfoliating or scrubbing agents. The composition can also be formed for dental or mouth use.
